Projects

Weather App | *Python, HTML, CSS, Javascript, VS Code, Visual Studio*   Nov. 2025 – Present
- Developed a program that uses OpenWeatherMaps's API key to access JSON data.
- Allows the user to enter a city and see instant results about the weather for that area.
- Implemented the ability to select the unit of temperature.
- Opens an HTML file in the web browser using Python 3 built in web browser library.
- HTML page has a changing background depending on the time and weather.
- The project is on GitHub.

Portfolio Website | *HTML, CSS, Javascript, VS Code, Visual Studio*   Nov. 2025 – Present
- Developed a website portfolio about myself.
- Includes education, projects, skills, about me, etc.
- Uses many animations and transitions, along with a contact me box at the bottom.
